

Import of insurance – TRUCK (IC_RS)

XML example: TRUCK_IC_datasheet_sendcontractXML_example.xml

List of entries: We prefer receiving all the below mentioned information including the fields that are designated as optional. Please note, that mandatory fields are necessary for loading the data to our system and without them we can't accept the import.

Mandatory_M_ necessary for loading the data to our system

Conditional_C_one of the set of data is mandatory (C or C' is necessary for loading the data to our system)

Optional_O_not necessary for loading the data to our system

	Název položky		Význam	Data type	Constant value	Data obligation
1.	Declaration from		Message sender	Constant	XXXX	M
2.	AuthenticatedID		ID verifying the identity of the sender	Number		M
3.	Message sequence ID		Message order (from 1 onwards, no spaces)	Number		M
4.	contractInsurance.type		Type of insurance contract	Constant	I	M
5.	contractInsurance.num		Number of contract. Please indicate a ten digit number beginning with a four digit prefix XXXX. The remaining 6 digits are at your disposal. We recommend to create a sequence beginning with 1, so for instance XXXX000001, XXXX000002,...	Number	XXXXXXXXXX	M
6.	contractInsurance.ipa		Insuring entity	Constant	PL	M
7.	contractInsurance.signDate		Date of signing of the contract	Date		M
8.	contractInsurance.signTime		Time of signing of the contract	Time		O
9.	installment.frequency		Installment frequency	Constant	YEAR	M
10.	holder.type		Type of policy holder. Indicate one of the constants: FO = natural person PO = juridical person	Enum	FO PO	M
11.	Only FO	holder.fo.name	Policy holder - name	String		M
12.		holder.fo.surname	Policy holder - surname	String		M
13.		holder.fo.birthday	Policy holder – date of birth	Date		C1 (One of these)
14.		holder.fo.rc	Policy holder - pesel	Number		
		holder.fo.sex	Policy holder - sex	Enum	M F	O
16.	Only PO	holder.po.name	Policy holder - name	String		M
17.		holder.po.ic	Policy holder - company identification number (NIP)	String		M
18.	holder.adr.street		Policy holder address – street and number	String		C2
19.	holder.adr.zipCode		Policy holder address – zip code	String		C2
20.	holder.adr.town		Policy holder address - town	String		C2
21.	holder.adr.state		Policy holder address – state (ISO code Alpha-2)	String		C2
22.	holder.tel		Policy holder – phone number	String		O

23.	holder.email	Policy holder – email	String		C2'
24.	insurance.pk	The unique identifier of an insurance. Its purpose is to ensure the possibility of making changes of the insurance in the future. When you send an insurance with a pk which we already have in the database, the system recognizes it not as a new insurance, but as a change request of the original insurance having the same pk. For this reason it is important to ensure the uniqueness of this value.	Constant	NEW	M
25.	insurance.numCust	Insurance number – it always consists of the contract number followed by a slash and a three digit number unique for each insured person under the contract, beginning from 001. So for example XXXX000001	Constant	xxxxxxxxx x	M
27.	insurance.status	Insurance status - always state „OK“ for active policies and „CANCEL“ for cancellations. New policies always come with the status „OK“. If you want to cancel a policy which you reported in the past, send it again with the status „CANCEL“. Please keep in mind that this cancels the policy as if it were never valid (the policy stays in the system, though). If you only want to shorten a policy, i.e. set a new end date but still keep the policy valid for some time period, send the policy again with the status „OK“ and new validTo value	Constant	OK CANCEL	M
28.	insurance.numAxa	Number of AA contract	Constant	xxxxx	M
29.	insurance.validFrom	Insurance start date	Date		M
30.	insurance.validTo	Insurance end date. State only if the insurance has a limited validity. If the insurance is valid for an unlimited time period (with an open end), leave this attribute empty or don't send it whatsoever.	Date		M
31.	product.numAxa	Insurance product code 01 BASIC 02 TOP 03 BEST+	Constant	01 02 03	M
32.	product.tarif	Insurance tarif (tarif of product): T6Z T10Z	Constant		M
33.	subject.pk	The unique identifier of the insured subject. Can be the same as insurance.pk.	Constant	NEW	M
34.	subject.type	Type of insured subject	Constant	CAR	M
35.	car.vin	VIN of the insured car	String		C3
36.	car.spz	Registration number of the car	String		C3'
37.	car.company	Manufacturer of the car (Fiat, Skoda etc.)	String		C3'
38.	car.model	Car model (Punto, Fabia etc.)	String		C3'
39.	car.type	Type of insured vehicle: - OV = passenger car	Constant	OV	M
40.	car.madeYear	Production year of the car	Number		C3'

41.	insured.type	Type of insured. Indicate one of the constants: FO = natural person PO = juridical person	Enum	FO PO	O
42.	Only FO	insured.fo.name	Insured - name	String	O
43.		insured.fo.surname	Insured - surname	String	O
44.		insured.fo.birthday	Insured – date of birth	Date	O
45.		Insured.fo.rc	Insured - pesel	Number	
46.		insured.fo.sex	Insured - sex	Enum	O
47.	Only PO	insured.po.name	Insured - name	String	O
48.		Insured.po.ic	Insured – company identification number	String	O
49.	insured.adr.street		Insured address – street and number	String	O
50.	insured.adr.zipCode		Insured address – zip code	String	O
51.	insured.adr.town		Insured address – town	String	O
52.	insured.adr.state		Insured address – state (ISO code Alpha-2)	String	O
53.	insurance.note		Note e.g. vehicle type (light/truck/set) // kolumna z masą pojazdu	String	O
54.	commission.oz		Sales representative number	Constant	xxxxx M
55.	commission.zp		Representative of the insurer	Constant	xxxxxxxxx M
56.	commission.sign		Number of person selling the insurance	Constant	xxxxxxxxx M

Changes: when you want to make any change in the insurance, please send the whole insurance again with the changes applied. Please keep in mind it is important to state the same insurance.pk and subject.pk values, otherwise we wouldn't recognize the insurance as a change request.
